

Section	Purpose	What User Sees	Rules/Judgements Driving It
Approval Verdict	Instant decision confidence	Clear status: BLOCKED / REVIEW REQUIRED / READY TO APPROVE with counts	Category A (Payout Catastrophes), Category B (Gross Anomalies)
Blockers	Prevent catastrophic payroll runs	List of non-negotiable issues that must be fixed before approval	Rules 1–12 (Negative net pay, massive drops, zero payroll, extreme outliers)
High-Risk Reviews	Surface changes that can cause regret	Ranked list of material but non-blocking risks with confidence scores	Rules 13–36 (Gross pay swings, employee adds/removals, timing errors)
Deduction & Compliance Checks	Avoid employee complaints & IRS issues	Grouped deduction anomalies with explanation	Rules 37–51 (US tax, benefits, garnishments)
Component Volatility	Catch config mistakes	Expandable component-level change groups	Rules 52–65 (bonus, retro, allowance, taxable flips)
Systemic Signals	Detect global payroll issues	Aggregate warnings (department spikes, title pay shifts)	Rules 74–87 (pattern & aggregate anomalies)
Noise Suppression	Build trust by ignoring what doesn't matter	minor changes with rationale	Rules 88–100 (minor deltas, seasonal patterns)

The Payroll Manager's Headspace (Anchor This),
 "I'm not here to analyze. I'm here to confirm nothing will blow up after I click Finalize."
 So the experience must: Reduce uncertainty, Surface career-risk items first, Let them exit confidently.
 As a reviewer, I should see the rule category, the column that is in question, old value, new value if applicable, why this matters in human readable explanation, possible actions to take to correct it.

Inside a Single Item (The Atomic Unit), Every flagged item must follow the same mental model.
 The 4-Line Golden Template:

Line 1 – What Changed: Net pay decreased by 12% (₹6,800). Evidence: Old value , New Value.
 Line 2 – Why You're Seeing This: Caused by retro tax recalculation for May
 Line 3 – Why This Is Risky: Impacts closed period; employee did not expect net decrease
 Line 4 – What To Do: Verify retro approval or defer to next cycle
 If any line is missing → anxiety increases.

The Final Moment: "Can I Click Finalize?" "Before approval, show one closing panel:

Before you finalize:
 All blockers resolved
 3 material items reviewed & acknowledged
 No statutory backdated impact

Then a single action:
 Finalize with Confidence

If they hesitate less than 2 seconds here — you've won.

Judgement examples:

Judgment Object (Final Output Contract),This is the product.

Every judgment emitted must contain:,{
